

Welcome to Bitcoin Design

Onboarding

2024

Getting Started

To set you up for success, we've created this guide to help. In it, you'll find resources for many of our documents and materials that you'll need as you embark on your journey here at Open-source Bitcoin Design.

You're welcome to ask questions as you go along. In fact, we encourage that. Sometimes you might even highlight a question that others have pondered too.

This guide will help you set a solid foundation for yourself by teaching you the basics of contributing to open source projects and bitcoin design as a designer.

Good luck!

Milestone 1

Build connections

- Duplicate this document and add "your name" [year.month] to the title.. You'll be using your version to check off this list. Ex. "Welcome to Bitcoin Design - John Doe [2022.02]"
- Join the [discord workspace](#)
- Introduce yourself in the introduction channel using this format below
 - 🗨️ A little about me
 - 🚀 What I am currently working on?
 - 🥕 What are my interest?
 - 🙋 A random question for the community?

- 🎉 A design joke that makes you laugh?

Milestone 2

Getting in rythm

- Sync the [bitcoin design calender](#) to your calender
- Attend your first call
- Start reading the bitcoin [design guide](#), if you haven't done so already

Milestone 3

Prep time

- Create your own copy of the bitcoin design [design system](#) and [ui kit](#) on figma
- Check out the community issues on the [github repo](#)
- Watch this [tutorial](#) to learn how to contribute on github

Milestone 3

You are ready

- Read the rest of this document if you haven't already
- Reflect on your personal why at bitcoin design
- Checkout the [bitcoin design foundation](#), its our little way of rewarding contributors for their efforts
- 🎉 Hurray, You made it! Share feedback on how settled you are now, your plans as a part of bitcoin design and where your onboarding experience could be improved with the team

Purpose

To be decided by the team

Principles
